

Mohnen Jilt 910 'THE SIRE MAKER' A WELCOME SWALLOW EXCLUSIVE

In 2006 on tour in the US we visited Mohnen Angus and saw Mohnen Jilt 910 for the first time with her magnificent calf at foot – now known as the AI Sire Mohnen Dynamite.

Jilt 910 is a multiple industry AI sire producing Dam with her sons Mohnen Day

Ahead, Mohnen Pioneer and Mohnen Dynamite. This cow caught the imagination of our entire USA tour party in 2006 and 2008. She is thick, sound, has plenty of capacity and will add carcass eliteness without a drop of Precision/Future Direction or New Design 036 blood in her pedigree – a true and proven high quality outcross. In addition, her maternal sister is the dam of the Alta Sire Mohnen Crown Royal as well as Accelerated Genetics Mohnen Brushpopper 295 – so this cow family has real sire making power.

With the help of Dale Edwards from High Country Heifers we were able to negotiate to contract flush Jilt 910. A total of 52 embryos were purchased from 4 different flushes to the following sires:

- Connealy Thunder
- SAV Net Worth
- Woodhill Admiral
- TC Aberdeen

In 2008 – 24 embryos were implanted with 18 live calves now approaching 1 YO and growing out well. The balance of 28 embryos were implanted in 2009 and are due to calve in September 2010.

The first Jilt sons will be offered for sale in 2011 – watch this space!

Top: Mohnen Jilt 910 is seen here photographed by Brett in the US in July 2010. Now aged 10½ years old, Jilt 910 clearly demonstrates what longevity and performance is all about. Above left: Mohnen Dynamite.
